

INTRODUCING: Chronic Airways Assessment Test (CAAT)

CAAT@gaapp.org

FORMERLY KNOWN AS THE COPD ASSESSMENT TEST (CAT)[™]

CAAT can now be used for assessing respiratory health status in people with asthma, not just COPD

- ◀ A standardized, easy to administer, health status measure for use across obstructive lung diseases.
- ◀ 8-items assessing aspects of disease relevant to patients.
- ◀ CAAT is the same as the original CAT except for the name and introductory sentence.
- ◀ Recently validated for asthma and/or COPD in the AstraZeneca NOVELTY study; Scan the QR code for references and to hear an educational video for healthcare providers.

The COPD assessment test (CAT) and the Chronic Airways Test (CAAT) were developed by an interdisciplinary group of international experts with support from GSK. CAT and CAAT activities are monitored by a supervisory council that includes independent experts, one of which is chair of the council. CAT, COPD Assessment Test, CAAT, Chronic Airways Assessment Test and the CAT logo are trademarks of the GSK group of companies. ©2009-2021 GSK 'Group of Companies' or its licensor.
